

# Indala FlexCard®

**FEATURES:**

- As with all Indala cards, the FlexCard is compatible with all Indala readers, and can be easily encoded with the Indala ProxSmith Programmer and toolkit.
- The passive, no-battery design allows for an infinite number of reads, and is warranted for life against defects in materials and workmanship.

- **Rugged ABS Construction** - Ideal for warehouse, factory, university settings.
- **Convenient Credit Card Size** - Can be carried in a purse or wallet.
- **Flexible and Light** - Features beveled edges and a thickness of only 0.065 inches (1.8 mm).
- **Vertical Design** - Well-suited for badge use.

HID's Indala FlexCard® standard clamshell card is "credit card" length and width, features beveled edges, and can accept photo-flap and direct-print adhesive-backed ID badge overlays.

The Indala FlexCard can be programmed in the factory or in the field using the Indala ProxSmith® Programmer and Toolkit with Wiegand, magnetic stripe and serial data formats.

Indala's FlexCard can be used interchangeably with other Indala credentials on most systems and can be ordered with specified facility codes and ID numbers. HID Indala's competitively priced FlexCard delivers the number sequence ordered with no gaps and with no under or overruns.

**Exclusive FlexSecur® Security Technology**

All HID Indala 125 kHz Proximity Cards feature FlexSecur technology, providing an added level of access system security through a verification process at the reader. A unique feature of the HID Indala product line, FlexSecur screens out unauthorized cards prior to sending card data to the host system.

This additional verification step enhances the security of your access system in two ways:

1. The entire card data field is encrypted prior to programming the card. Therefore, the data on the card cannot be decoded to determine the actual information on the card. Only the reader is able to decrypt the data and transmit it to the access control system.
2. Cards and readers can be programmed uniquely for each site, protecting the end user against unauthorized entry attempts by using cards from another facility. Again, this is unique to the HID Indala product line.

**FEATURES:**

- **Compatibility** - Works with HID Indala 125 kHz readers. It can also be used interchangeably with other Indala credentials.
- **High Security** - Utilizes Indala FlexSecur® technology; data encryption, 172 user definable bits, password protection, and security between card and reader.
- **Two Points of Authentication** - Works with HID Indala 125 kHz readers. It can also be used interchangeably with other Indala credentials.
- **Expanded Credential Information** - Use the 172 bits to code employee's office location, grade level, department location, or any other pertinent credential information.

**SPECIFICATIONS**

**FlexCard®**

<b>Standard Part Number</b>	FPCRD-SSSMW-0000			
<b>Description</b>	125 kHz, Indala logo (front), embossed Indala logo (back), inkjet marking on embossed side (lower right corner with slot to the right), vertical slot punch, no artwork.			
<b>Dimensions</b>	3.38"H x 2.13"W x 0.065"T (86 mm x 54 mm x 1.8 mm)			
<b>Weight</b>	0.4 oz (12 g)			
<b>Module</b>	Slim/Wallswitch	Classic	Mid-Range	Long Range
<b>Typical Maximum Read Range*</b>	Up to 5" (12 cm)	Up to 5" (12 cm)	Up to 12" (30 cm)	Up to 26" (63 cm)
<b>Cover Design</b>	Linear/Arch/ Curve/Wave	Linear	Arch/Wave	Arch
<b>Operating Temperature</b>	-22° F to 149° F (-30° C to 65° C)			
<b>Inkjet Marking</b>	Includes sales order number and ID number matching internal ID.			
<b>Custom Graphics</b>	Available on FlexCard® with customer-supplied artwork.			
<b>Slot Punch</b>	Vertical			
<b>Coding</b>	Wiegand, ABA Track II Magnetic Stripe, others available (exact coding standard, with no gaps or over-runs)			
<b>Programming</b>	Factory or field programmable via Indala ProxSmith® Programmer and Toolkit			
<b>Warranty</b>	Lifetime			

\* Dependent upon installation conditions.
